TE02 Egg Machine

This image only supplies the reference, please take the actual product as the standard.

TE02 is a special marking machine for eggs developed based on the company's independently developed T600 (6-head thermal inkjet printer). The customized bracket can be adjusted according to the size of the general egg trays on the market, and can be adjusted up and down to suit the egg size. The adjustment range is up to 14mm, ensuring that every egg can be placed close to the printhead for perfect printing. The outside of the chassis is equipped with a print head height adjustment handle to facilitate users to adjust the printing height of the print head at any time. Currently, TE02 is equipped with a 10-inch industrial touch screen. A variety of compliant food contact grade inks are available. Customized aluminum conveyor belts are optional and can be customized according to customer requirements.

Our Strengths

1.Dimension: L380×W600×H340mm	2.Conveyor belt speed: 5-15 meters/minute
3.Weight: 25kg	4. Display: 10-inch resistive screen
5. Printhead: Single head printing height:12.7mm, quantity: 6 by default	
6. Conveyor belt size:height: 750mm,belt width: 350mm
